Mouldpro – Innovation driven by you

Mouldpro offers a comprehensive range of products for injection moulding professionals, including mould sprays, consumables, water couplings, specialist tools and accessories.

All of our products are available through a network of carefully selected distributors who offer expert industry knowledge and share our vision and commitment to customer service.

Mouldpro is committed to supplying the highest quality products at competitive prices and by listening to our customers we have continually evolved our product range to reflect the ever changing demands of the market.

We hope that you will find suitable products for your applications in our catalogue and welcome your feedback.

Introducing the new range of Sprays from Mouldpro;

Designed for Moulding Professionals by Moulding Professionals.

The distinctive label design against the metallic finish of the can evokes a precision style which will be appreciated by the professional moulder.

The four different aerosol types are easily identified by a specific colour; Yellow, Clean; Blue, Release; Green, Lubricate and Red, Protect. The angled wraparound design together with the coloured halo effect means that the aerosol type can be easily identified from any angle.

Designed to perform to exacting standards Mouldpro's unique formulations ensure that whatever task you undertake, there is a product available, with a further range having been developed to ensure that they comply fully with NSF standards for use in food and medical environments.

Supplied in 500ml aerosols as standard the Mouldpro range represent maximum value for money for the injection moulder.

Mould Cleaners

Mould Cleaner / Degreaser
Part No. MCD501

Cleaning agents remove plastic residue from moulds and dies including residues caused by cracking, for example. They provide for time-saving production processes, for dimensional accuracy of plastic parts and mouldings, for flawless surface structure and also preserve machine components.

- Features**
 - Degreaser for removing oil, grease and wax residues from moulds
 - Supplied in aerosol form, all aerosols are free of fluorocarbons

Mould Citrus Cleaner / Degreaser
Part No. MCD551

Citrus Based Solvent Degreaser. High performance citrus based cleaning solvent. An ideal alternative to traditional chlorinated or highly volatile solvent cleaners. Slow drying which allows maximum cleaning results.

- Features**
 - Natural based, high performance cleaner/ degreaser
 - Fully biodegradable
 - Deep penetrating action
 - Classified as non-flammable
 - Safe on metals and most plastics
 - Effective on a wide range of soiling such as oil, grease, tar, bitumen, silicones, rubber-based adhesives, oil-based paints, inks and dyes
 - Pleasant orange Citrus odour

Mould Cleaner / Polymer Remover
Part No. MPR501

Cleaning agents remove plastic residue from moulds and dies including residues caused by cracking, for example. They provide for time saving production processes, for dimensional accuracy of plastic parts and mouldings, for flawless surface structure and preserve machine components.

- Features**
 - Designed to remove polymer deposits, plastic, antisoluble resins, grease and oils
 - Water soluble
 - Highly active organic cleaner
 - Supplied in aerosol form, all aerosols are free of fluorocarbons

Anti-Static Multi Purpose Foam Cleaner
Part No. MFC501

Mouldpro Foam Cleaner is a unique anti-static foaming cleaner based on a blend of surfactants, solvents, inhibitors and water.

- Features**
 - Unrivalled in performance
 - Quickly and easily removes all types of dirt, grease, stains, soiling and other contamination from hard surfaces

Disposable Wipes

Mould Cleaner Wipes

Part No. **WMC80**

Mould Cleaner Wipes are specifically developed for cleaning and degreasing of mould surfaces.

Features

- Ultra-low linting non-abrasive wipe
- Leaves no residues
- Supplied in tub of 80 wipes

Rust Remover Wipes

Part No. **WRR80**

A tough textured wipe impregnated with citric acid cleaners to remove rust and other oxides from ferrous metal surfaces. Using a non-hazardous chemical and a tough, textured wipe material the product provides an effective alternative to traditional hazardous nitrate based chemicals used for rust removal.

Features

- Supplied in tub of 80 wipes

Multi Wipes

Part No. **WMW100**

Ideal for the quick and easy clean-up of hands, tools and machine surfaces. The heavy duty Multi Wipe material is impregnated with a hi-tech cleaning solution that contains antibacterial properties for fast removal of dirt, oil, grease, adhesives, varnishes, scuff marks, wet paint, mastic and expanding foam. Multi Wipes combine high performance with minimal hazard to the user and the environment.

Features

- Contains no white spirits or other harmful solvents
- Wipes contain antibacterial properties certified to BSEN1276 Standard
- Supplied in tub of 100 wipes

Mould Lubricants

NSF Ejector Pin Lubricant (not pictured) Part No. MLF080
Part No. MLF500*

Non-soiling lubricants that keep moving parts running smoothly and prevent damage due to breakage and seizing.

- Features**
- For Slides and Ejector Pins
 - Thin-film lubrication, Food Grade, long term action, good protection from corrosion
 - Operating Temperature - up to 260°C

NSF Ejector Pin Lubricant Part No. MLF501FG

Non-soiling lubricants that keep moving parts running smoothly and prevent damage due to breakage and seizing.

- Features**
- For Slides and Ejector Pins
 - Thin-film lubrication, Food Grade, long term action, good protection from corrosion
 - Operating Temperature - up to 260°C

Copper Assembly Compound (pictured below) Part No. MCS080
Part No. MCS500*

Mouldpro Copper Anti-Seize ensures rapid and easy assembly of threaded parts. It allows correct torque to be applied by eliminating thread interference.

- Features**
- Prevents seizing and galling
 - Gives quick and easy breakout of threads, gaskets and packings even after long exposure to high temperature, corrosive conditions or extreme surface pressures
 - Reduces wear in areas of high friction

Maintenance Lubricant Part No. MWD501

A multi-purpose product for lubricating, cleaning, dewatering, penetrating and corrosion protection. Can be used in endless applications on all metallic surfaces including moulds, chains, gears, tools, etc.

- Features**
- Long lasting lubrication moisture displacement
 - Forms a temporary anti-corrosion coating
 - Penetrates rust and corrosion
 - Contains PTFE for improved lubrication and load resistance

Ejector Pin Lubricant Part No. MEL501

Non-soiling lubricants that keep moving parts running smoothly and prevent damage due to breakage and seizing. For Slides and Ejector Pins.

- Features**
- Thin-film lubrication, long-term action, good protection from corrosion
 - Application temperature range : -30°C - +150°C
 - Supplied in aerosol or paste form, all aerosols are free of fluorocarbons

Quality you can rely upon

Not every product needs to conform to such exacting standards, but for those that do, Mouldpro have developed a range of lubricants, cleaners and protectors which conform to NSF guidelines. The NSF mark is your assurance that the product has been tested by one of the most respected independent certification organisations which is valued by consumers, manufacturers, retailers and regulatory agencies alike.

The NSF mark provides:

- Knowledge that an impartial review against established criteria has been conducted
- Evidence that product labelling has been objectively reviewed by a trusted third party
- A way to differentiate your product from your competitors'
- Evidence of your organisation's commitment to quality, compliance and safety
- Backing by a team of professionals dedicated to public health and safety

...from a name you can trust.

Mould Release

Mould Release - Silicone Free Part No. MRN501

Universal release agent on a base of synthetic oils.

Features

- A high quality proven release agent that ensures trouble free moulding
- Saves time, shortens cycle times, reduces scrap and is gentle on dies and moulds
- Suitable for thermoplastic or thermoset moulding

Mould Release - Silicone Part No. MRS501

Universal release agent on a base of silicone

Features

- A high quality proven release agent that ensures trouble free moulding
- Saves time, shortens cycles times, reduces scrap and is gentle on dies and moulds
- Suitable for thermoplastic or thermoset moulding

Mould Protection

Mould Protect, Green

Part No. **MPG501**

Anti-corrosion agents provide dismantled dies, moulds and parts with long-term protection against corrosion. This ensures that your mould is always ready for use, maintaining value and efficiency.

Features

- Wax-type anti-corrosion agents - it is not necessary to remove the protective film prior to use
- This agent does not creep
- Supplied in aerosol form, free from fluorocarbons

Mould Protect Wax, Clear

Part No. **MPW501**

Anti-corrosion agents provide dismantled dies, moulds and parts with long-term protection against corrosion. This ensures that your mould is always ready for use, maintaining value and efficiency.

Features

- Wax-type anti-corrosion agents - it is not necessary to remove the protective film prior to use
- This agent does not creep
- Supplied in aerosol form, free from fluorocarbons

Moulding Essentials

Mouldpro supply a full range of consumables and industrial supplies specifically designed for the professional injection moulder. See our new ranges of sealants and spill absorbents.

TEK LOC

Pipe Sealant

Part No. 577

- Features**
- Maximum Pipe Size: 3"
 - Disassembly strength: Medium
 - Temperature range: -50°C - +150°C
 - Breakaway torque: 11 Nm
 - Pack sizes: 50ml, 250ml

Thread Locker

Part No. 77

- Features**
- Maximum Thread Size: M80
 - Disassembly strength: High
 - Temperature range: -50°C - +150°C
 - Breakaway torque: 32 Nm
 - Pack size: 50ml

Thread Locker

Part No. 542

- Features**
- Maximum Pipe Size: 3"
 - Disassembly strength: Medium
 - Temperature range: -50°C - +150°C
 - Breakaway torque: 11 Nm
 - Pack sizes: 50ml, 250ml

TEK SPILL

Maintenance Roll

Part No. MMR46DB

- Features**
- Suitable for oil and water
 - Size 38cm x 46m
 - Pack absorbency 76l
 - 1 roll

Maintenance Socks

Part No. MMS120DB

- Features**
- Suitable for oil and water
 - Size, 8cm x 120cm
 - Pack absorbency, 75l
 - 15 Socks

Maintenance Pads

Part No. MMP100DB

- Features**
- Suitable for oil and water
 - Size, 40cm x 50cm
 - Pack absorbency, 85l
 - 100 Pads

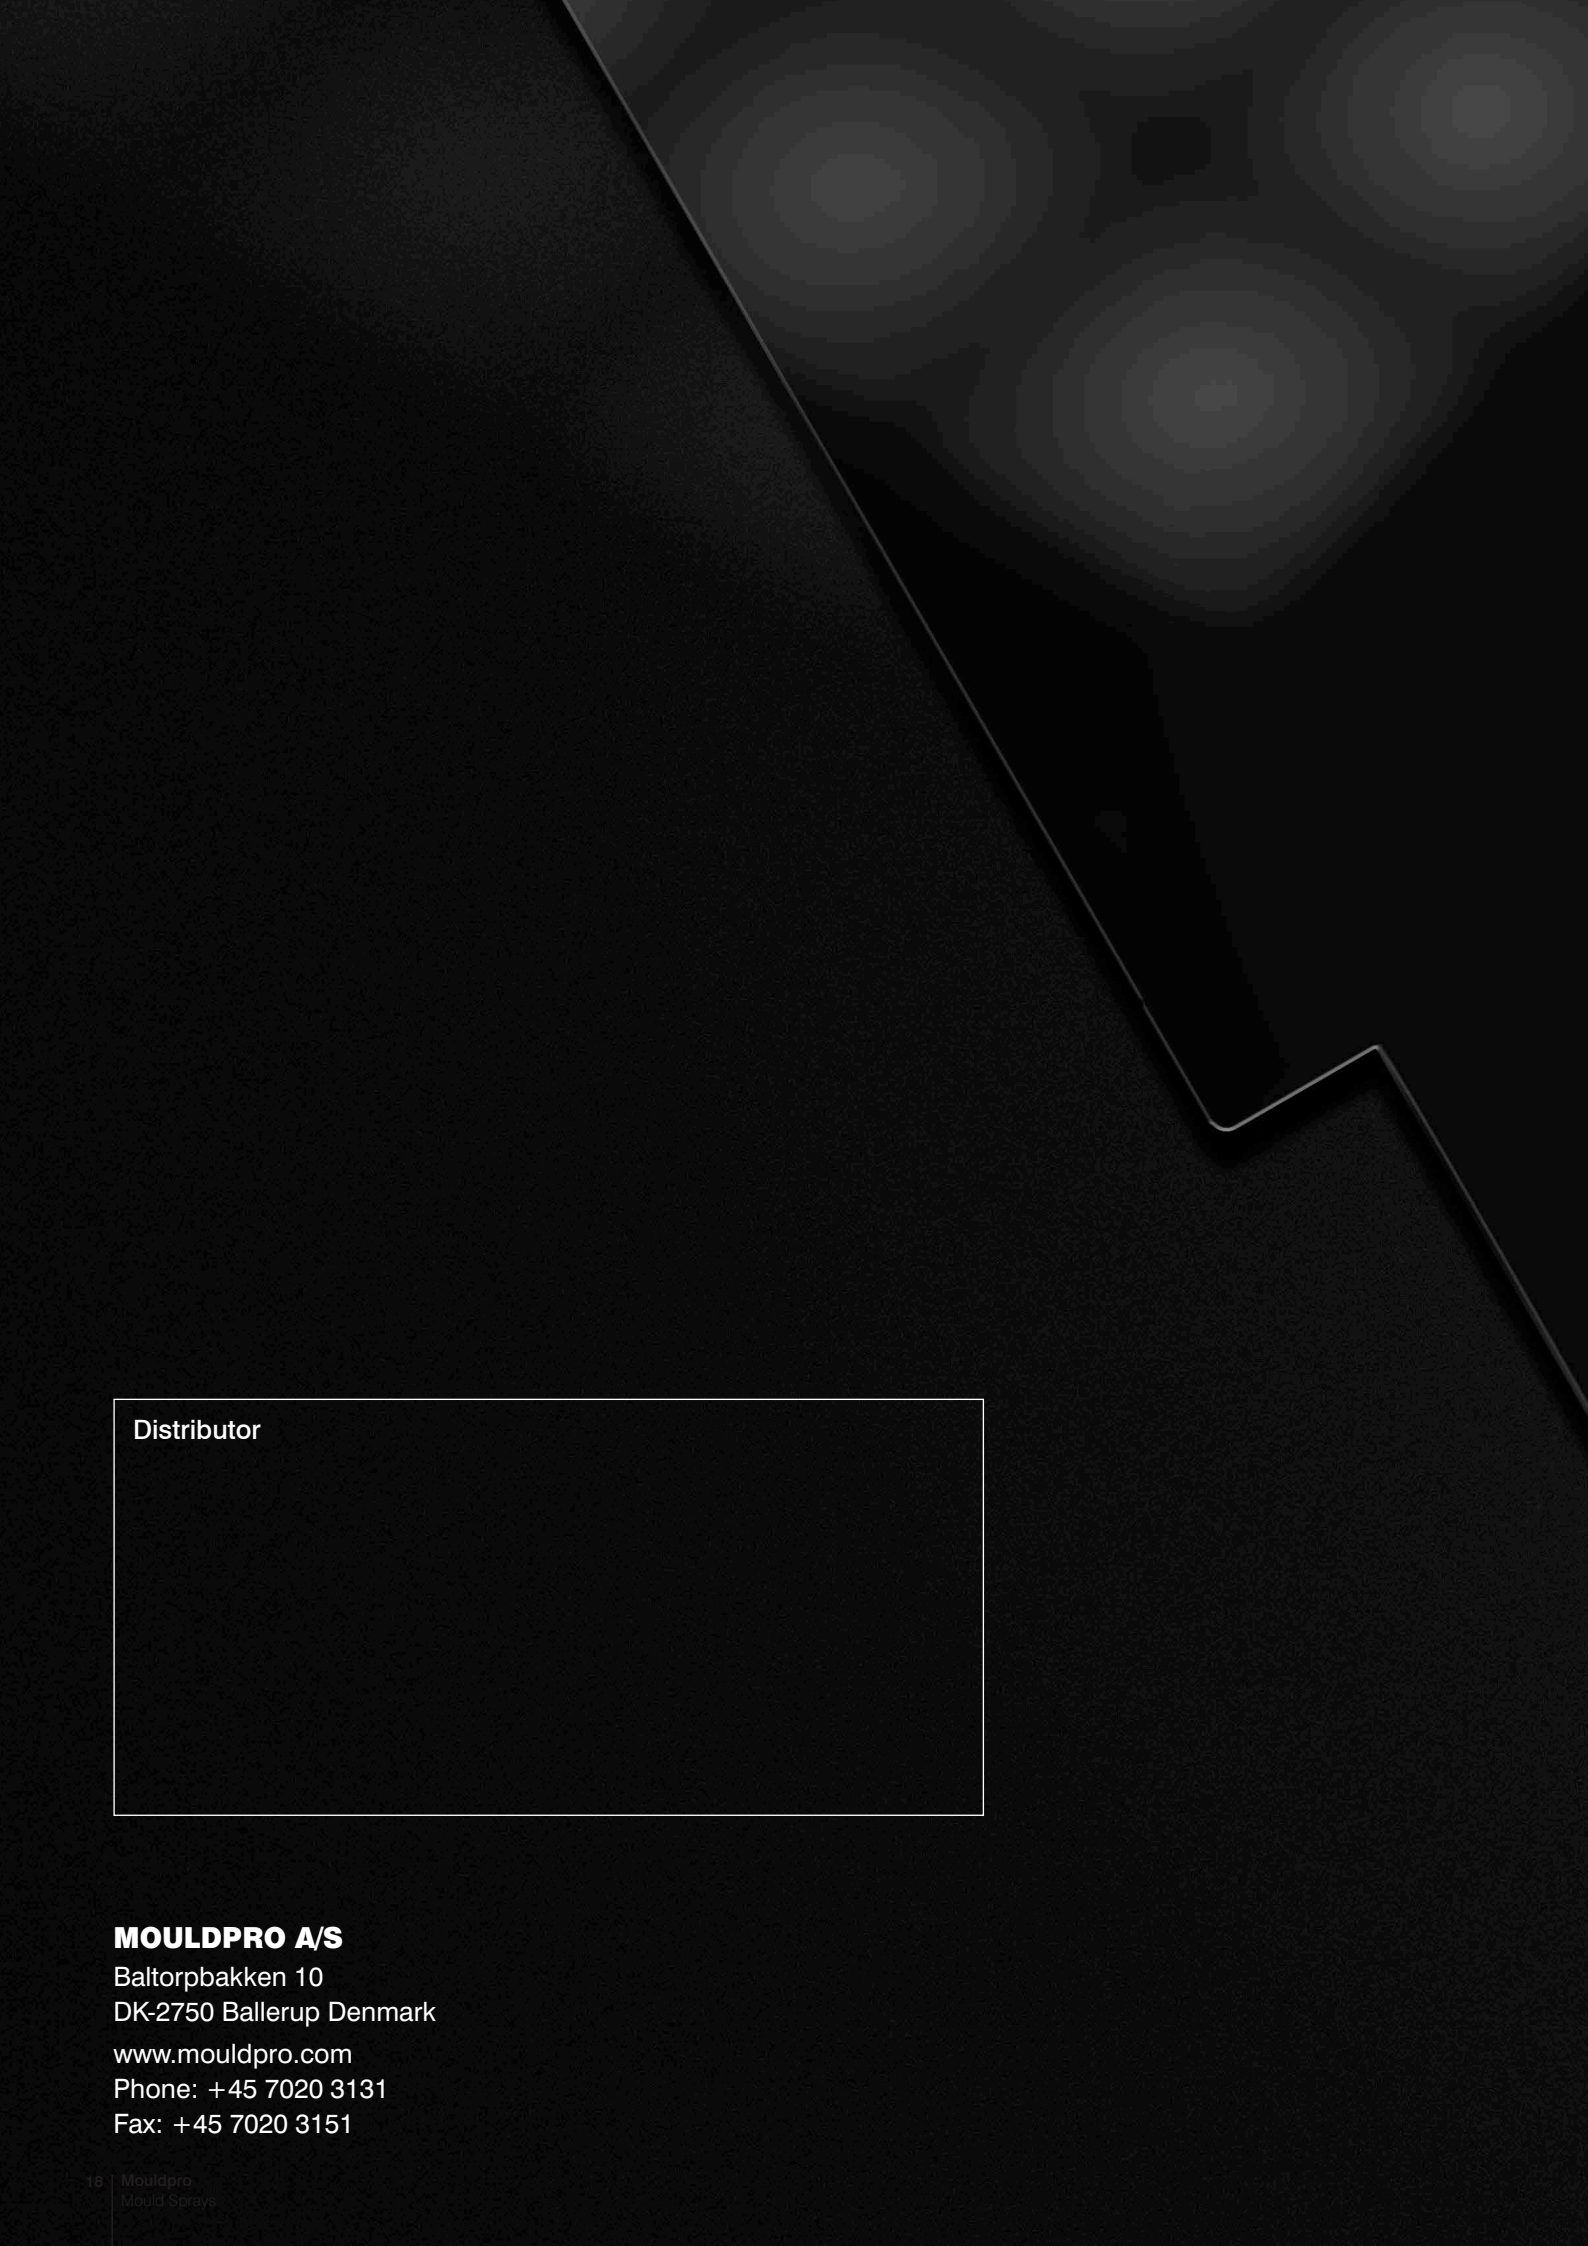

Don't take our word for it
Why not try them for yourself?

We're confident that you are going to love our new range of Mould sprays, but don't take our word for it, try them for yourself. Ask your sales representative for your free sample pack or email us on: sales@mouldpro.com
